

ANOTHER HUNTER DOUGLAS EXCLUSIVE

Rethink remote  
control.

Tap into the  
Power of the  
Platinum™ App.

# The Platinum™ App

Several shades smarter

**From first light to movie night:** continuous, creative control now rests in your customers' hands. Far more than a remote, the smart technology of the Platinum™ App enables them to preset and reset the precise position of multiple window coverings for optimal privacy, security, energy management and mood. Moreover, customized slider bars for each Platinum App Certified window covering make programming slide-to-set simple.

- + Scene control. Room control. Individual shade control. Timed Control.
- + Single-touch perfection.
- + Total control. That's why it's several shades smarter!

## HunterDouglas

# SEE HOW THE NEW PLATINUM™ APP OUTS

## It's smart technology made simple.

With the new, easy-to-use Platinum™ App, your customers can operate their PowerRise® 2.1 and PowerGlide® 2.1 motorized window coverings using their iPad®, iPhone® or iPod touch®. More than a dozen HunterDouglas window fashion styles feature the fresh, customized technology, opening new vistas for optimizing the home environment.

### This is creative control like never before.

For the first time, customers can design the ambient effect they desire by:

#### Scene

A simple touch of the “Good Morning” scene could raise the shades in the kitchen and living room, letting in just the right amount of light for a warming wake-up. Tapping “Good Night” might lower all shades in the home for maximum privacy and security.

#### Room

Use the slider bar to close all the window coverings in the “Master Bedroom” and get a restful night's sleep.

#### Time of Day

Like clockwork, individual and group window coverings can be precisely positioned for security, energy efficiency and personal preference. The Platinum™ App's timer can automatically set and reset the scene, even when the mobile device is not in the home.

Rethink remote control.

Tap into the Power of the Platinum™ App.

Customers can precisely control their Hunter Douglas window coverings by scene, by room, by time of day.

Reference Guide

# HINES REMOTE CONTROL POSSIBILITIES.

## The customized slider-bar simplifies set up.

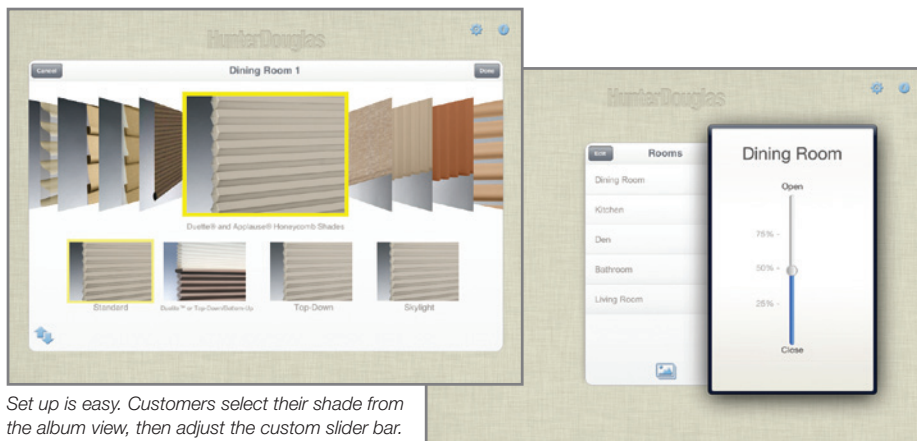

Customers will appreciate the simplicity of setting up the Platinum App. A customized slider control will appear after selecting a specific shade type from the album view. Personalize the way you name your shades and never move the wrong one again!

## The Platinum system is comprised of sleek, discreet components.

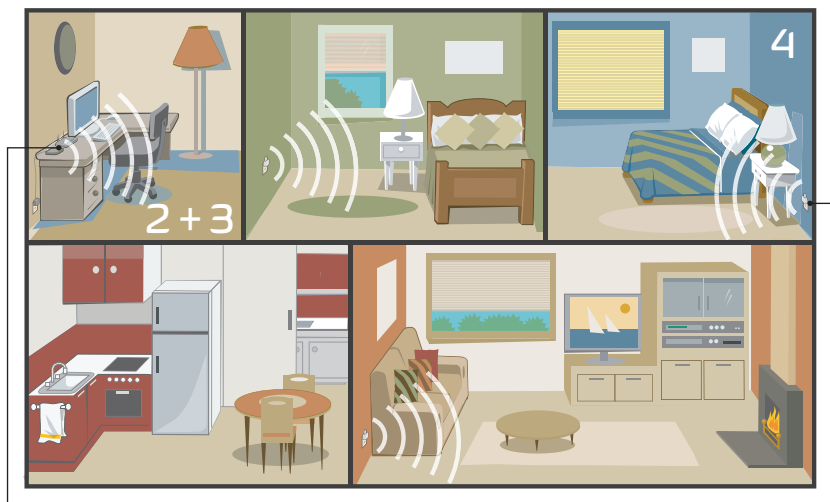

The Platinum App Bridge is the heart of the system. It stores your programmed data and sends signals to operate window fashions via Platinum Repeaters. Platinum Repeaters simply plug into a wall outlet and extend the range of the signal throughout your home. It's recommended to have at least one repeater in each room where a motorized window fashion is located.

Your customer can download the Platinum App for free.

Set up is easy. Customers select their shade from the album view, then adjust the custom slider bar.

Standard and Tiered™
- The Alustra Collection products  
available in many styles

### Frequently Asked Questions

**Q:** How do I know if my Hunter Douglas motorized shades are compatible with the Platinum App?

**A:** The Platinum App is compatible with all PowerRise® 2.1 and PowerGlide® 2.1 systems. This can be verified by the “Platinum App Certified” label affixed to the power cable attached to the shade motor cable.

**Q:** Can I operate my shades from anywhere in the world using the Platinum App on my Apple® device?

**A:** The initial release of the Platinum App will allow homeowners to operate their Hunter Douglas motorized shades while connected to their wireless home network

(i.e. you have to be in the home and connected to the wireless network). Future updates will include the ability to control your shades via the internet.

**Q:** Can I wirelessly control my Hunter Douglas motorized shades from my home automation system?

**A:** At this time, Hunter Douglas motorized shades must be wired for automation system control.

**Q:** Do I still need a Platinum remote or wireless wall switch to operate my shades?

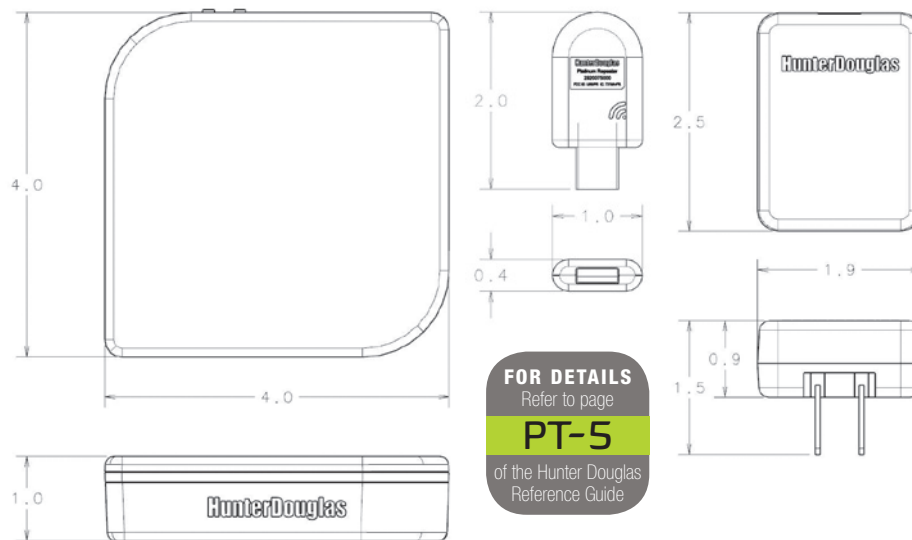

**A:** A Platinum remote and/or wireless wall switch is highly recommended in addition to using the Platinum App. These devices allow for alternate control as well as a set up tool (e.g. use the remote to set an Intermediate Stop position for a shade).

**Q:** What devices are compatible with the Platinum App?

**A:** The iPad®, iPhone®, and iPod touch® with iOS 5.0+.

**Q:** Is the Platinum App available for Android OS devices?

**A:** Although the Platinum App has been originally designed for the Apple mobile device platform, Hunter Douglas will be introducing an Android platform version shortly. Please check the Hunter Douglas website for availability.
