

INTRODUCING POWERSVIEW™ MOTORIZATION

A NEW WAY TO CONNECT WITH 21ST CENTURY CUSTOMERS.

Introducing PowerView™ Motorization, the latest innovation from Hunter Douglas and our most intelligent operating system yet. PowerView Motorization wows contemporary customers with its all-new wireless technology, PowerView Pebble™ Remote, mobile App and more. Set “Scenes” to create the right ambience for any occasion. Personalize the natural light in any room or throughout the home. PowerView Motorization fits perfectly with today’s connected lifestyle.

OUR MOST INTELLIGENT, RELIABLE SYSTEM YET

- All-new wireless technology, with increased RF range and the addition of two-way communication for a more robust product.
- Not backwards compatible with Platinum™ Technology (PowerRise®, PowerGlide® or PowerTilt™) products.

POWERSVIEW PEBBLE REMOTE

- The Pebble Palette™ is artfully designed to personalize and harmonize with any home décor.
- Available in seven on-trend colors.
 - Black Matte, Clear Frost, Citron, Cobalt, Pewter Frost, Poppy, and White. The inner remote module is available in white or black, giving you a plethora of personalization options.

POWERSVIEW SURFACE REMOTE

- Fits to any wall for visually pleasing, wall-mounted remote control.
- The sleek, matte-finish colors complements any décor. Available in Black Matte, Nickel Matte, and White Matte.

Alustra Woven Textures. Shown with the Citron PowerView Pebble Remote.

MOTORIZATION

Set the Scene

TO CREATE THE RIGHT AMBIENCE FOR ANY MOMENT.

With the PowerView™ App and PowerView Pebble™ Scene Controller, customizing the light in a room is just a tap away. Customize Scenes such as “Wake Up,” “Movie,” “Hot Weather,” “Breakfast,” “Nighttime” and more to help make the connected lifestyle even more convenient. It’s simple to set Scenes to Schedules for automatic operation that fits your unique lifestyle. With RemoteConnect™, shades can even be controlled while away from home.

PowerView App

- Create personalized settings (called Scenes) within one room, multiple rooms or throughout an entire home.
- Schedule Scenes for automatic operation that fits your consumers' individual needs.
- Available on Apple® iOS devices and Android™ mobile devices.
- Requires PowerView Hub for operation.

PowerView Pebble Scene Controller

- Works in conjunction with the PowerView App to provide immediate access to a personalized list of Scenes.
- Use the scroll buttons and OLED screen to quickly select and activate a personalized Scene or select from two Favorite Scene options.
- Also available in the PowerView Surface Scene Controller wall mount option.
- Requires PowerView Hub for operation.

RemoteConnect

- Set window treatments in motion at any time, anywhere.
- Remotely access your Scenes and Schedules with a mobile device when away from home.
- RemoteConnect must be set up within the home using the PowerView Hub and PowerView App.

Helping you get up to speed on PowerView™ Motorization.

THIS IS ONE OF YOUR GREATEST OPPORTUNITIES AS A HUNTER DOUGLAS DEALER. Recommending PowerView™ Motorization opens the doors to a wider range of customers, more sales and a more prosperous future.

ONLINE MOTORIZATION TRAINING

- Your resource for all Motorization-related training.
- Easily accessed directly from my.hunterdouglas.com.
- Includes quick at-a-glance videos, in-depth courses, interactive PDFs and much more.

RETROGRADE PROGRAM

For consumers looking to purchase new Hunter Douglas motorized window treatments after launch in 2015 but prefer that they work together with existing Platinum™ 2.1 products in the home.

- Until early 2016, PowerRise® 2.1 and PowerGlide® 2.1 (with the exception of Pirouette® window shadings) will be offered for users looking for Platinum Technology compatibility.
- Platinum Technology products do not support the advancements of PowerView Motorization, requiring different hardware and control methods.
- The Platinum App will continue to be supported and updated, as needed.

Innovation that's Fashion Forward.

ADDITIONAL PRODUCT BENEFITS

- Transform light and set the mood in a home with the press of a button or tap of a mobile device.
- Schedule the operation of window treatments to optimize a home's energy efficiency.
- With no operating cords, PowerView™ Motorization contributes to a safer environment for young children and pets.
- PowerView Motorization is the perfect solution for both newly constructed and existing homes.
- Battery and plug-in power options available.
- PowerView Pebble™ Remote reinvents remote control by creating an ergonomic fit, implementing more intuitive push button control, and adding "Favorite" position functionality.

FAQs

Q: What Hunter Douglas products are available with PowerView Motorization?

A: Alustra® Woven Textures®
Applause® honeycomb shades
Design Studio™ Roman Shades
Designer Roller shades
Designer Screen shades
Duette® honeycomb shades
Luminette® Privacy Sheers
Nantucket™ window shadings
Pirouette® window shadings
Pleated shades
Provenance® Woven Wood Shades
Silhouette® window shadings
Skyline® Gliding Window Panels
Solera® Soft Shades
Vignette® Modern Roman Shades
Applicable Alustra Collection products

Q: How do I know if my Hunter Douglas window treatments have PowerView Motorization?

A: Any motorized Hunter Douglas window treatment listed above, manufactured after May 2015, is built with PowerView Motorization. Some exceptions may apply for special requests.

Q: Do I need an internet connection to set up the PowerView App to control my shades?

A: No, an internet connection is not necessary.

Q: What does the Favorite button do?

A: A "Favorite" position can be created and set for every PowerView motorized window treatment in the home. The Favorite button is a quick and easy way to send shades to preset position(s) from a single press.

Q: Can I use my new PowerView Pebble Remote to operate my PowerRise® 2.1 shades that I previously purchased?

A: The new PowerView components use a different communication method from the previous Platinum™ Technology platform and cannot be used to control older Hunter Douglas products.

Q: How many shades can I control using the PowerView Pebble Remote or PowerView Surface Remote?

A: A PowerView Remote can be used to operate six shades individually or hundreds of shades as a group, as long as the shades can receive commands from the remote.

Q: What is the PowerView Pebble Scene Controller?

A: The PowerView Pebble Scene Controller works in conjunction with the PowerView Hub to quickly navigate and activate your personalized list of Scenes.
